

Douglas S. Erickson, FASHE

Consultant, Codes and Standards
American Society for Healthcare Engineering of the American Hospital Association

Mr. Erickson currently provides consulting services in codes and standards advocacy to the American Society for Healthcare Engineering (ASHE).

He has been providing service to the health care community for over 30 years in the areas of Joint Commission Environment of Care compliance, NFPA Life Safety Code® compliance, management evaluations of engineering departments and environmental infection control. He is the past director of engineering for the Joint Commission (1977 - 1981) and past director of design and construction for the American Hospital Association (1985 - 1995). He currently represents the AHA/ASHE membership on multiple National Fire Protection Association Technical Committees such as, NFPA 101 Life Safety Code, NFPA 1 Uniform Fire Code, NFPA 5000 Building Construction and Safety Code, NFPA 90A Heating and Ventilating Code, NFPA 70 National Electrical Code - Panel 15.

Adele Houghton, RA, LEED® AP

Green Guide for Health Care

Adele Houghton, Architect, serves as Project Manager for the Green Guide for Health Care, currently released as Version 2.1 Pilot. Adele manages the day-to-day business of the Green Guide for Health Care, including its educational outreach projects such as the monthly newsletter and teleconference series. Adele also works with the Center for Maximum Potential Building Systems in Austin, TX, on green building policy work and graphic design. She is a member of the American Institute of Architects; a member of the Austin, TX, Chapter of the AIA Committee on the Environment; and, a member of the US Green Building Council.

 **Joint Commission's Building Maintenance Program Quiz Show** - This session will highlight the use of the Building Maintenance Program for complying with elements of NFPA's Life Safety Code.

 **NFPA Codes and Standards Update** - This session will review all of the latest changes to the codes and standards affecting health care facilities. It will also provide a look into the future direction of NFPA 99, 101, and the National Electrical Code.

 **Panel Discussion - Are the National and State Codes on Target** - This panel discussion will be an open forum to discuss whether the national and state codes, standards, and regulations are providing us with what we need to operate a health care organization. Many of us have opinions on whether the written regulations are too high or too low, or may be just right. The panel will be made up of facility managers, designers, code writers, and regulators. If you wish to ask a question of the panel and desire anonymity, an enclosed booth and voice disguising equipment will be provided! Remember, these are your codes and standards, and if you are not satisfied with how they are being written the panelist need to know.

 **What is LEED®?** - The Leadership in Energy and Environmental Design (LEED) Green Building Rating System™ is the nationally accepted benchmark for the design, construction, and operation of high performance green buildings. LEED gives building owners and operators the tools they need to have an immediate and measurable impact on their buildings' performance. LEED promotes a whole-building approach to sustainability by recognizing performance in five key areas of human and environmental health: sustainable site development, water savings, energy efficiency, materials selection, and indoor environmental quality.
